

Gas-Efficiency Programs for Con Edison Commercial Customers

Existing Facilities - provides pre-qualified and performance-based incentives for implementing gas-efficiency measures.

Incentives for Pre-Qualified Gas-Efficiency Measures	
Cap	\$30,000
Boilers < 300,000 Btuh	\$500 to \$1,000 per unit
Boilers > 300,000 Btuh	\$750 to \$4,500 per unit
Steam Boilers	\$1.00 per kBtu/hr.
Storage Water Heater Tank Insulation	\$1.00 per sq. ft.
New Circulation Controls	\$500 per unit
Infrared Unit Heaters - Low-intensity	\$500 per unit
Vent Damper	\$1.00 per kBtu/hr.
Pipe Insulation	\$3.00 per foot
Duct Insulation	\$0.50 per foot
Programmable Thermostats	\$25 per unit
Demand Control Ventilation	\$200 per unit
Cooking Equipment	Up to \$750 per unit
Commercial Steam Trap Replacement	\$70 per unit

Performance-Based Incentives	
Cap	75% of project cost or \$500,000
Gas Efficiency Measures regarding furnaces, boilers, water heaters and process heating equipment installed by an ESCO or Customer on a customer case by case basis	\$2.00 per therm saved

New Construction Program (NCP) - provides performance-based incentives for implementing gas-efficiency measures.

NCP: Performance based Incentives	
NCP Cap	\$1,000,000
Any approved Gas-Efficiency Measure identified in a Technical Assistance Study	\$2.50 per therm saved

New York Energy SmartSM Loan Fund - provides a “buy down” of the lender’s interest rate by up to 650 basis points or 6.5%, for loans for energy efficiency improvements. 6.5% reduction of interest rate applies to eligible Con Edison gas customers. Improvements coinciding with each Tier in the Enhanced Commercial /Industrial Performance Program are eligible for a reduced interest rate loan.

Loan Cap: 6.5% up to \$1,000,000

Technical Assistance and FlexTech - provides engineering feasibility and technical assistance studies, detailed analysis of specific electric or gas energy projects, process improvement studies and implementation assistance.

FlexTech: 50% cost-share
Cap of \$100,000/study

Energy Audit Program - provides energy audits to small businesses and other facilities to help them make informed energy decisions and implement energy-efficiency strategies.

Energy Audit: Customer pays \$100 or \$400 per audit
