

NEW YORK ENERGY \$MARTSM PROGRAM QUARTERLY EVALUATION AND STATUS REPORT

QUARTERLY REPORT TO THE DEPARTMENT OF PUBLIC SERVICE
QUARTER ENDING JUNE 30, 2005

This report updates the **New York Energy SmartSM** Program progress through June 30, 2005. The following information is presented: (1) budget status; (2) summary of energy, economic, and environmental outcomes; (3) energy savings by program; and (4) solicitations that were released during the most recent quarter.

Figure 1. Overall Budget Status as of June 30, 2005

As of June 30, 2005, nearly \$882 million of the \$961 million eight-year budget, or 92%, has been committed.¹ Approximately \$801 million, or 83% of the total budget, has been contracted, and \$562 million, or 58% of the total budget, has been paid out. Funds paid, contracted, and committed through year-end 2003, 2004 and the second quarter of 2005 are shown in Figure 1.

The budget status for each major program area is shown in Figure 2. The Business/Institutional Program area has committed 95% of the budgeted funds, the Residential Program area has committed 102% of the budgeted funds, the Low-Income Program area has committed 104% of budgeted funds, and the R&D Program area has committed 79% of budgeted funds. The proportion of paid funds relative to budgeted funds is as follows: Business/Institutional Program area has paid 56%, the Residential Program area has paid 89%, the Low-Income Program area has paid 47%, and the R&D Program area has paid 40% of budgeted funds. The higher payout rate for the Residential Program area is due to the shorter project turnaround times and funds paid directly for marketing support.

Figure 2. Budget Status by Program Area as of June 30, 2005

¹ Committed funds are funds associated with signed and pending contracts.

ENERGY, ECONOMIC, AND ENVIRONMENTAL OUTCOMES SUMMARY

Table 1 shows a summary of the energy, economic, and environmental outcomes from the **New York Energy \$martSM** Program through year-end 2002, 2003, 2004 and the quarter ending June 30, 2005. As of June 30, 2005, annual electricity savings from installed measures were approximately 1,580 GWh. The peak demand reduction² from installed measures totaled approximately 990 MW, with 373 MW counted as permanent reductions available through energy efficiency improvements and renewable and on-site generation, and 617 MW available to be called upon when needed through load management programs (curtailable load). Energy bill savings from electricity, natural gas, and oil are estimated to be \$218 million per year. These savings occur every year that the measures are in place. Approximately 4,380 jobs were created through June 30, 2005 as a result of the Program.

Table 1. Summary of Energy, Economic, and Environmental Outcomes From Installed Measures

	Through Year-End 2002	Through Year-End 2003	Through Year-End 2004	Through June 30, 2005
Electricity Savings From Energy Efficiency (Annual GWh)	690	1,000	1,400	1580
Peak Demand Reduction (MW)	652	880	860 ^a	990
Permanent Measures (MW)	218	270	325	373 ^c
Curtailable Load (MW)	434	610	535 ^a	617
Annual Energy Bill Savings - Includes electricity, natural gas, and oil (\$ Million)	\$94	\$140	\$195	\$218
Renewable Energy Generation (Annual GWh)	103	103	102 ^b	102
Jobs Attributable to the Program	3,200	3,500	4,200	4,380
NO _x Emissions Reductions Associated with Energy Efficiency and Renewable Energy Production (Annual Tons)	675	950	1,280	1,430
SO ₂ Emissions Reductions Associated with Energy Efficiency and Renewable Energy Production (Annual Tons)	1,190	1,700	2,320	2,590
CO ₂ Emissions Reductions Associated with Energy Efficiency and Renewable Energy Production (Annual Tons)	528,000 (equivalent to removing 106,000 automobiles from New York roads)	750,000 (equivalent to removing 159,000 automobiles from New York roads)	1,000,000 (equivalent to removing 200,000 automobiles from New York roads)	1,119,000 (equivalent to removing 224,000 automobiles from New York roads)

^a Findings by Measurement and Verification contractor resulted in decreased curtailable MW and, consequently, total MW.

^b Renewable Energy Generation (Annual GWh) revised due to application of lower capacity factor.

^c Includes Renewable Energy Generation and Combined Heat & Power Demonstrations.

² The peak demand period is defined as June 1 to August 31, Monday through Friday, excluding holidays, 12 to 6 PM.

ENERGY SAVINGS – SELECTED PROGRAMS

The energy benefits from energy efficiency and renewable/on-site generation measures installed through year-end 2002, 2003, 2004, and the quarter ending June 30, 2005 are shown in Table 2. Starting in 2003, the reported energy savings were adjusted by evaluation contractors that examined savings methodologies, program spillover, and other market effects. The adjustments were not applied to 2002 and earlier savings values.

Table 2. Energy and Peak Demand Reductions Summary³

	Installed Through Year-End 2002		Installed Through Year-End 2003		Installed Through Year-End 2004		Installed Through June 30, 2005	
	GWh	MW	GWh	MW	GWh	MW	GWh	MW
Business and Institutional (B/I) Programs								
C/I Performance Program	235.0	52.0	282.3	41.5	515.4	75.4	604.4	91.2
New Construction Program	41.9	4.8	94.8	20.3	128.2	31.3	149.0	35.2
Smart Equipment Choices	13.0	6.0	48.9	22.7	52.7	11.2	56.7	15.3
Peak Load Reduction (permanent measures) ⁴	47.8	19.9	43.9	15	68.8	27.0	91.3	36.3
Peak Load Reduction (curtailable load enabled) ⁵	-	434.2	-	598	-	392.0	-	456.3
Enabling Technology (curtailable load enabled) ⁵	-	-	-	-	-	135.6	-	147.2
Premium Efficiency Motors	5.0	1.0	6.3	1.2	8.3	1.3	8.5	1.3
Small Commercial Lighting	1.9	0.4	3.8	0.95	16.9	4.0	21.3	5.1
Hospitality Lighting Program	-	-	-	-	-	-	7.0	0.7
Commercial HVAC	0.3	<0.1	0.3	0.1	8.3	2.6	8.3	2.6
Loan Fund	8.9	1.5	18.7	2.4	28.7	8.5	38.2	10.1
Technical Assistance Program ⁶	225.6	60.0	361.0	96.0	515.1	96.6	591.6	110.5

³ Due to the integrated nature of NYSERDA's programs, savings for a measure may be claimed by each program the customer accessed. To accurately reflect net savings, deductions are made at the sector level to account for these instances of overlapping savings. Overlap for this quarter within the B/I sector programs is estimated to be 247 GWh and 48 MW; and cross-sector overlap is estimated at 21 GWh and 5 MW.

⁴ Includes 25 GWh and 9 MW from the Cooling Recommissioning, a closed pilot program that preceded the Peak Load Reduction Program.

⁵ Peak Load Reduction Program metrics for years ending 2002 and 2003 include Enabling Technology savings.

⁶ The Technical Assistance program savings were developed by applying realizations rates to program savings occurring in 2004 and before then, added to 2005 savings that were estimated off amount invoiced to the program. This method will be used until actual savings information is aggregated from TA studies.

	Installed Through Year-End 2002		Installed Through Year-End 2003		Installed Through Year-End 2004		Installed Through June 30, 2005	
	GWh	MW	GWh	MW	GWh	MW	GWh	MW
Technical Assistance Program (Curtable Load Enabled) ⁷	-	-	-	-	-	8.8	-	9.9

**Program closed

SOLICITATIONS UPDATE

Table 3 provides information on Requests for Proposals (RFPs) and Program Opportunity Notices (PONs) that were released during the second quarter of 2005.

⁷ The Technical Assistance program savings were developed by applying realizations rates to program savings occurring in 2004 and before, then added to 2005 savings that were estimated off amount invoiced to the program. This method will be used until actual savings information is aggregated from TA studies.

⁸ The percentage of residents in the **New York Energy Smart**SM territory who shift their laundry and dishwashing tasks to off-peak hours has grown steadily between 2002 and 2004 due to the Keep Cool and Stay Cool marketing campaigns, increasing from 42% to 90% for laundry and from 57% to 84% for dishwashing. These activities have resulted in an average hourly load shift of over 100 MW.

⁹ Renewable Energy Generation (Annual GWh) revised due to application of lower capacity factor. Nameplate capacity of renewables installations is 42.6 MW.

Table 3. Solicitations Released in Second Quarter 2005

Solicitation Number	Solicitation Name	Solicitation Release Date	Solicitation Closing Date
R&D Program Area			
PON 929	Next Generation Energy Efficient Residential Control Technologies	5/9/05	8/17/05
Business and Institutional Program Area			
PON 933	Retrocommissioning Initiative for Commercial Buildings	4/18/05	12/31/05
PON 922	Innovative Opportunities	5/23/05	7/18/05
PON 932	CHP and Renewable Generation Technical Assistance	5/31/05	11/30/05
